SMART ENTRY

Züge, Hüllen und Bremsleitungen werden mit Einsätzen auf Zug verlegt, damit Sie bei der Fahrt im Gelände oder auf holprigem Untergrund nicht klappern. Die „Smart Entry“-Einsätze sind komplett austauschbar und kommen mit Di2 ebenso klar wie mit Hydraulikleitungen, Brems- und Schaltzügen.

WIRE PORT

Der WIRE PORT sorgt für eine aufgeräumte sowie cleane Optik und verhindert gleichzeitig, dass der Rahmen durch die freiliegenden Zughüllen verkratzt wird. Je nach Modell sind die Züge komplett innen verlegt (einschliesslich Lenker und Vorbau) oder teilweise integriert, wenn die Züge unter dem Vorbau in den Rahmen geführt werden.

X-TAPER HEADTUBE

Unser X-Taper Steuerrohr bietet Platz für eine konische Gabel, die hervorragende Steifigkeit sowie präzises, sicheres Lenkverhalten bietet und damit viel Vertrauen schafft.

PROLITE 66 TRIPLE BUTTED ALUMINIUM

Unser bewährtes High-End-Aluminium (6066) ist extrem leicht und robust. Mit dreifach konifizierten Hydroforming-Rohren können wir dem Material das bestmögliche Steifigkeits-Gewichts-Verhältnis beibringen.

HYDRO FORMING SYSTEM (HFS)

Die Rohre werden in Hohlformen eingelegt, in die ein heisses Öl-Wasser-Gemisch gepresst wird. So erzeugen wir komplexe, aufregende Formen auf höchstem Leistungsniveau.

F-MOUNT

Mit F-MOUNT ausgestattete Fahrräder verfügen über integrierte Befestigungsteile für Schutzbleche, die die Montage schnell und einfach machen (einige Fahrräder benötigen modellspezifische Schutzbleche).

INTERNAL CABLE ROUTING

Die Züge werden im Rahmen geführt und treten durch unauffällige Anschläge ein und aus. Dadurch wird eine optimale Funktion sowie eine ansprechende Optik ermöglicht und eine Geräuscentwicklung effizient verhindert.

FLEX STAY

Profil und Carbon-Layup von Ketten- und Sitzstreben wirken zusammen wie eine Blattfeder, nehmen Fahrbahnstösse auf und reduzieren Vibrationen – für einen spürbar höheren Komfort.

THERMO GATE

Spezielle Öffnungen in der Nähe des Steuerrohrs funktionieren wie ein Kamin und führen warme Luft nach aussen ab, um eine optimale Betriebstemperatur des integrierten Akkus zu garantieren. Dank des THERMO GATE kann der Akku unter allen Bedingungen seine beste Leistung abrufen.

SUPERLITE 16 ALUMINIUM

Unsere neueste Aluminium-Sorte (6016) erlaubt minimale Wandstärken, bietet dabei aber eine beeindruckende Festigkeit. Damit ist das Material ideal für anspruchsvolle Renn- und Trainingseinsätze im Gelände.

TECHNO FORMING SYSTEM (TFS)

Technoforming ist ein mechanischer Umformungsprozess, bei dem Hohlformen und teilweise auch Kerne aus Metall zum Einsatz kommen. Durch den Pressvorgang beim TFS lassen sich moderne, dreidimensionale Formen realisieren.

REMOVABLE F-MOUNT

Abnehmbare Sitzstreben-Brücke, die in Verbindung mit einem hinteren Schutzblech oder Gepäckträger einen sicheren und eleganten Sitz gewährleistet. Für ein aufgeräumtes Erscheinungsbild und gegen ein Festsetzen von Schmutz kann die Sitzstreben-Brücke abmontiert werden.

DOWN TUBE EXIT

Stellt sicher, dass innenliegende Züge und Leitungen frei beweglich sind, keinerlei Probleme verursachen und leicht zu warten sind.

P-FLEX

Die Nachgiebigkeit des Materials sowie die spezifische Form der Rohre erlaubt es dem Rahmen an der Verbindungsstelle von Sitzstrebe und Kettenstrebe zu flexen, was ein Gelenk überflüssig macht. Durch den Verzicht auf ein Gelenk sparen wir Gewicht ein und erhöhen die Steifigkeit.

FLIP FLOP HEAD

Aero-Räder liefern bestmögliche Aerodynamik, doch Spitzendaten im Windkanal sind nutzlos, wenn der Fahrer auf dem Bike nicht die perfekte Position einnehmen kann. Der „Flip Flop“-Sattelstützenkopf erlaubt Komfort und Effizienz durch eine optimale Anpassung des Sitzwinkels.

RACELITE 61 ALUMINIUM

Leichtes und hochwertiges Aluminium 6061 aus der Luftfahrt ist bei uns das Minimum.

Mit zusätzlicher Wärmebehandlung und doppelt konifizierten Rohren können wir damit leichte, steife Rahmen auf der Höhe der Zeit produzieren.

SMOOTH WELDING

Hier glättet ein zweiter Schweissvorgang die Schweissnähte. Das verleiht dem Rahmen eine organische Optik. Auf den ersten Blick sehen die Übergänge so fließend wie bei Carbon aus.

C-MOUNT

Mit C-MOUNT ausgestattete Fahrräder sind mit integrierten Befestigungspunkten für einen Gepäckträger ausgestattet, was die Montage schnell, einfach und verlässlich macht (einige Fahrräder benötigen einen modellspezifischen Gepäckträger).

INTERNAL CLAMP

Die Entwicklung von WorldTour-Rädern läuft ähnlich ab wie in der Formel 1: Scheinbar belanglose Details können Sekundenbruchteile einsparen. So minimiert die integrierte Sattelklemme Verwirbelungen am Oberrohr.

NACA FASTBACK PROFILE

Unser Aero-Konzept basiert auf einem NACA0028-Tropfenprofil (National Advisory Committee for Aeronautics), das im hinteren Bereich abgeschnitten ist. Die Luft bewegt sich um das Rohr, als wäre die fehlende hintere Partie des Profils vorhanden; dabei wird Material und Gewicht gespart.

INTERNAL BLOCK

Erstmals 2015 bei unserem NINETY-SIX eingeführt, ist die neue Version unseres Lenkanschlags direkt in den Rahmen eingearbeitet. Im Fall eines Sturzes oder eines starken Lenkeinschlags verhindert dieser ein Anschlagen der Gabelkrone und dadurch eine Beschädigung des Unterrohrs. Eine Gummierung ist als zusätzlicher Schutz angebracht.

ENERGY CRADLE

Das „Energy Cradle“-Unterrohr nimmt den Akku auf, ohne Kompromisse bei der Rahmesteifigkeit einzugehen. Ein Verwinden des Rahmens bei voller Beladung wird dadurch vermieden. Die Akkuabdeckung vermittelt den Eindruck eines komplett in den Rahmen integrierten Akkus, jedoch ohne Einbussen bei der Stabilität oder der Zugänglichkeit zum Akku.

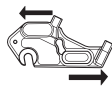

DISC COOLER

Ein geschmiedetes Aluminium-Bauteil unter beiden Bremssätteln führt über CNC-gefräste Kühlrippen Wärme ab. Tests zeigen um rund 35 % reduzierte Temperaturen; dazu kühlen die Bremsen schneller ab, was ihrer Funktion zugutekommt.

LONG FENDER

Das ONE-FORTY sowie das ONE-SIXTY können mit einem langen Schutzblech ausgestattet werden, das vor Schmutz und Spritzwasser schützt. Das lange Schutzblech kann zusätzlich zum standardmässig montierten kurzen Schutzblech angebracht werden, das den Hauptdrehpunkt und die Kabel schützt und deren Lebensdauer verlängert.

SLIDER DROPOUT

Die verstellbaren Ausfallenden bietet viel Platz für die horizontale Anpassungen der Kettenspannung, ohne einen Kettenspanner zu benötigen. Das grossvolumige Design sorgt für optimale Rahmesteifigkeit.

FLOAT LINK REAR SUSPENSION

Hier bewegt sich die untere Dämpferaufnahme mit, um ein sensibles Ansprechverhalten zu erzielen. So können Übersetzungsverhältnis sowie die Progression genau beeinflusst werden. Ein weiterer Vorteil: Ein besonders softes Ansprechverhalten und das Gefühl von mehr Federweg als tatsächlich vorhanden.

ENERGY GUARD

Ein Zwei-Komponenten-Akkudeckel für den perfekten Schutz des Akkus. Die weichere (äussere) Schicht reduziert Geräusche, dichtet das Unterrohr perfekt ab und absorbiert Steinschläge. Die härtere (innere) Schicht verhindert eine Beschädigung des Akkus und sorgt für die strukturelle Form. Alle für eine perfekte Passform wichtigen Teile, wie das Gummiband und die O-Ringe, sind austauschbar.

AWS – ANTI WRINKLE SYSTEM

Bei der Fertigung einzelner Carbon-Elemente wird eine mit Luft gefüllte Blase verwendet, die sicherstellt, dass auf der Innenseite des Rohrs keine Falten entstehen, denn diese könnten das Gewicht erhöhen und Schwachstellen bilden. Das Ergebnis ist ein leichter, steiferer und stabilerer Rahmen.

CASTED MOTOR BRACKET

Eine besonders durchdachte Formgebung, die nur durch den Einsatz moderner Gusstechnik möglich wird. Sie sorgt für eine optische Integration des E-Bike Motors und verbindet diesen optimal mit dem Rahmen, was Funktion und Verlässlichkeit zugutekommt.

FAST KINEMATIC

Flexstay-Hinterbauplattform mit einer spezifischen Federkinematik. Modelle mit längerem Reach weisen eine höhere Progression auf, um auch mit höherem Gewicht oder aggressiverer Fahrweise besser zurechtzukommen. Mit einem Flip-Chip wird ermöglicht, dass zwei 29"-Laufräder oder gemischte Laufradgrössen ohne die Geometrie zu verändern gefahren werden können.

K-MOUNT

Integrierte Befestigungsbasis zur Aufnahme eines MERIDA Seitenständers.

Di2 READY

Räder und Rahmen mit dem Symbol Di2 READY sind für die Installation der Shimano Di2-Technologie vorbereitet. Der Akku wird in der Sattelstütze oder im Gabelschaft untergebracht.

ENERGY GUARD TWIST

Drehverschlussmechanismus am oberen Ende des „Energy Guard“-Akkudeckels für ein einfaches Ver- und Entriegeln der Schutzabdeckung des integrierten Akkus.

NANO MATRIX CARBON

Um bei Carbonrahmen maximale Festigkeit zu gewährleisten, werden die Fasern in ein Epoxidharz mit beigemengten Nanopartikeln eingebettet, was die Schlagfestigkeit um bis zu 40 % erhöht.

NON-SLIP TIGHTENING

Ausgewählte Schrauben können mit einem TORX 30 Schlüssel von einer Seite angezogen werden, ohne Gefahr zu laufen, dass die Gegenseite durchrutscht. Das ermöglicht ein schnelles und direktes Anziehen wichtiger Befestigungsschrauben.

MERIDA SERVICE POUCH

Leicht zugängliche Serviceklappe am Tretlagerende des Unterrohrs bei Bikes mit Carbon-Rahmen. Die SERVICE POUCH ermöglicht einen einfachen Zugang zu den Zügen und Leitungen, die intern durch das Unterrohr verlaufen, sowie die Aufbewahrung von Tools und einer Minipumpe.

GET ROWDY ON REPEAT

eONE-EIGHTY

Unser E-Bike mit dem üppigsten Federweg aller Zeiten: 180 mm an der Front und am Heck, ein robuster Aluminiumrahmen mit neuer Fahrwerksplattform, die auf unserer preisgekrönten FAST-Kinematik des eONE-SIXTY aufbaut und sie zu neuen Höhen führt. Dank der Kompatibilität mit Coil-Dämpfern, einem Mullet-Setup in Serie sowie einer ganzen Reihe weiterer Features ist das eONE-EIGHTY für jeden Spass zu haben. Ob bergauf oder bergab, das eONE-EIGHTY ist "ready to rock". Zudem ist es auch unser erstes E-MTB mit dem Bosch Performance Line CX-Antrieb, der mit 85 Nm kraftvolle Unterstützung und leise Performance bietet. Dank des neuen 800-Wh-Akkus und der Option einen 250-Wh-Zusatzakku anzuschliessen, kann es zudem auch mit einer grossen Reichweite überzeugen.

POISE AND POWER

eONE-SIXTY SL

Eine neue Art von E-Mountainbike: Das eONE-SIXTY SL bringt die Gelassenheit und das Handling eines klassischen Bikes ohne Unterstützung mit der Power des Bosch SX-Antriebs mit 55 Nm zusammen – damit du weiter und schneller fahren kannst. Dank des leichten Carbonrahmens, eines fein ausbalancierten Fahrwerks mit 160 mm Federweg sowie einer Ausstattung, die knallharte Performance mit geringem Gewicht verbindet, verwischt das eONE-SIXTY SL die Grenze zwischen einem Bike und einem E-Bike. Selbst ein leichtes Full-Power-E-Bike hat gegenüber einem nicht unterstützten Bike einen erheblichen Gewichtsnachteil. Daher erweitern wir 2025 unser bahnbrechendes E-Bike-Sortiment um unser erstes Light-Support-E-MTB – und unser erstes eONE-SIXTY mit Bosch-Antrieb.

ANY TRAIL. ANY PLACE.

eONE-FORTY

Das neue eONE-FORTY bietet genau das – Alltagstauglichkeit und fein abgestimmte Offroad-Fähigkeiten. Die Möglichkeit, ganz einfach Schutzbleche, einen Gepäckträger sowie einen Seitenständer und eine Beleuchtung zu montieren, unterstreicht die Vielseitigkeit des neuen eONE-FORTY. Die EQ-Modelle kommen bereits in Serie mit Vollausstattung. E-Mountainbiking ist im Laufe der Jahre erwachsen geworden. Vor diesem Hintergrund haben wir unser gesamtes vollgefedertes E-MTB-Sortiment unter die Lupe genommen und komplett überarbeitet. Stark beeinflusst von den preisgekrönten ONE-SIXTY und ONE-FORTY-Bikes, begeistert unser neues E-Fully-Portfolio mit einer langen Liste an bewährten Innovationen, bahnbrechenden Ideen und Technologien, die das Fahrgefühl grundlegend verbessern.

BOOST YOUR LIFESTYLE

eFLOAT

Egal, ob du zur Arbeit pendelst, einen Einkaufsbummel durch die Stadt machst oder einfach dem Alltag entkommen willst, um am Wochenende neue Energie zu tanken: in einem MERIDA eFLOAT findest du einen treuen Begleiter. Durch die Kombination unseres Know-hows in der Konstruktion von Aluminiumrahmen mit den verbesserten, leistungsstarken Antriebssystemen von Bosch, den zahlreichen Akku-Optionen und den intuitiven Displays haben wir E-Bikes erschaffen, die auf raffinierte Weise an die Bedürfnisse von Allroundern für die Stadt, Trekking und für leichte Cargo-Aufgaben angepasst sind.

UNTAMED EVOLUTION

ONE-SIXTY FR

Das ONE-SIXTY FR nutzt die bewährte Aluminium-LITE-Rahmentechnologie des ONE-SIXTY und verbessert sie, um ein Bike für den Park zu schaffen, das robust genug ist, um von morgens bis abends zu fahren. Mehr Federweg vorne, gefederte Dämpfer und "Vokuhila"-Lafräder in gemischter Grösse basieren auf einem robusten Aluminiumrahmen und einem gut sortierten Federungssystem, so dass das ONE-SIXTY mit einer "Go-Big"-Einstellung gebaut wurde, die bereit ist, Schläge immer wieder abzuwehren. Wir wissen, dass Ripper aller Altersgruppen Wert auf ein gutes Preis-Leistungs-Verhältnis legen. Deshalb haben wir das Budget auf die bestmögliche Federung, Reifen und Bremsen konzentriert und nicht auf eine ausgefallene Kettenschaltung oder eine leichte Ausrüstung, die nicht lange hält.

MAXIMUM RACE AND TRAIL PERFORMANCE

NINETY-SIX

Das neue NINETY-SIX ist ein äusserst modernes Cross-Country-Race-Bike. Modern bedeutet in diesem Fall, dass es wesentlich potenter im Downhill ist als sein Vorgänger. Hauptgrund hierfür: Die Cross-Country-Rennen, die in den letzten Jahren um ein Vielfaches anspruchsvoller geworden sind. Hinzu kommt, dass von einem Bike dieser Kategorie mittlerweile viel mehr Bergab-Performance erwartet wird als noch vor einigen Jahren.

TRAIL FUN SIMPLIFIED

BIG.TRAIL

Neben der Angleichung der Rahmengrösse an das bestehende MTB-Sortiment wurde die ohnehin schon progressive Geometrie des BIG.TRAIL verfeinert, um das Handling in steilem und anspruchsvollem Gelände noch weiter zu verbessern. Im Grössenvergleich (z.B. vom bisherigen Medium zum neuen Mid) hat sich der Reach vergrössert, denn Tests haben gezeigt, wie sehr sich der Reach auf die Stabilität eines Trailbikes auswirkt. Im Einklang mit dem verlängerten Reach haben wir den Stack vergrössert, so dass das Vorderrad leicht gepoppt werden kann, ohne dass sich das Bike zu gestreckt anfühlt. Das Sitzrohr bleibt kurz für eine super niedrige Überstandshöhe und ist jetzt gerade für eine maximale Einstecktiefe, so dass auch bei kleineren Rahmengrössen lange Federwegsstützen montiert werden können. Dadurch hat der Fahrer mehr Spielraum auf dem Rad, ein grosser Vorteil auf Trail-Hardtails, wenn das Terrain anspruchsvoller wird.

VERSATILITY MEETS SPEED

SPEEDER

Unser SPEEDER kombiniert die Geschwindigkeit und das geringe Gewicht eines Rennrads mit einer bequemeren und aufrechteren Fahrposition und ist damit der perfekte Partner für schnelle Pendel- und Fitnessfahrten. Durch kraftvolle Scheibenbremsen, einen flachen Lenker, der die Kontrolle verbessert, und grössere Reifenfreiheit erhöht es den Komfort. Road.cc nannte es ein „exzellentes, schnelles Flatbar-Rennrad mit grossartiger Performance“. Das SPEEDER ist ein schickes, praktisches und vielseitiges Bike, das unfassbar viel Spass macht.

STREAMLINED RACE COMPLIANCE

SCULTURA

Seit seiner Einführung ins MERIDA Road-Portfolio verkörpert das SCULTURA das Leichtgewicht unter den Rennrädern und ist die erste Wahl, wenn es um herausragende Klettereigenschaften geht. Das REACTO, sein Aero-Pendant, steht dagegen für bahnbrechende Aerodynamik und pure Effizienz. Die fünfte Ausgabe des SCULTURA übernimmt einige Aspekte unseres vielfach getesteten und preisgekrönten REACTO, verbessert dadurch seine Aerodynamik und steigert gleichzeitig seinen bereits beeindruckenden Komfort noch weiter. Die beeindruckenden Verbesserungen in puncto Komfort, Aerodynamik und Gewicht haben sich bereits in der WorldTour bestens bewährt: Schon vor dem offiziellen Launch des Bikes konnte Team Bahrain Victorious damit vier Etappen gewinnen. Auch wenn diese Erfolge bereits Beweis genug für die Sieger-Gene des Bikes sind, ist die Erfolgsgeschichte noch lange nicht zu Ende.
